Jairam
PLASTIC INDUSTRIES

“ We are leading manufacturer, supplier and exporter of Recycled Plastic Granules in India since last **25 years**. With the vast knowledge and experience in plastics we have been scaling new heights of success. We at Jairam believe in Timely Delivery and Complete Customer Satisfaction. Our product has wide range of applications thereby catering to multiple industries like Kitchenware, Moulding, Household Items, Electronics, HDPE and other Pipe Applications.

Team of professionals work round the clock to maintain different parameters like Moisture Resistance, Accurate Composition, Effectiveness, Strength, Density and Quality of Colour and thereby adhere to International Quality Standards. Primary focus of our company is to have largest and finest production facility to cater global demanding needs thereby reducing a global waste being dumped at landfills and help maintain a Eco Friendly Environment.

In addition to our renowned and established credential, we have established ourselves as a trusted and highly respected Green Global Citizen.”

for a
better tomorrow*

► PP Granules

JAIRAM offers a wide range of PP colored granules that are manufactured using colored plastic waste including plastic pigments that finds applications in various industries such as plastic, food packaging and textile.

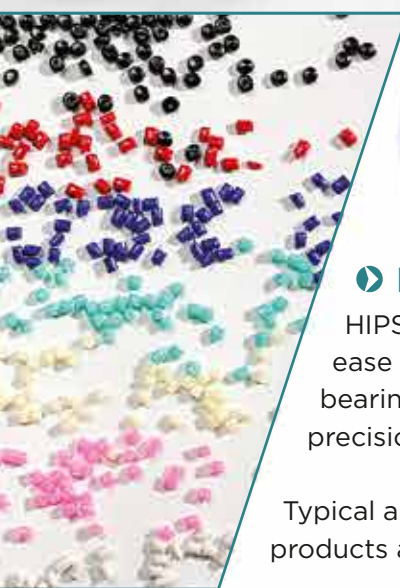

Some of the salient features of our range are Flame Resistance, On-oxidizing Character, On-toxic to some extent, Chemically Stable.

► HD Granules

We offer high quality HD granules that is used in diverse industrial sector for specific applications. HD granules are specially processed to reflect strength in different applications.

High density lends itself particularly well to Blow Molding e.g. for bottles, cutting boards, dipping baskets, trays and containers.

► LD Granules

We offer high quality LD plastic granules, which are widely used in various applications in the manufacturing of recycled plastic pellets and transition pellets, agricultural pipe and industrial use, extrusion coated packaging materials, injection molded products, foamed and blow molded products.

► HIPS Granules

HIPS Granules have several advantages over other polymers because of their clarity and ease of processing. They are generally recognized as the best styrenic material for load bearing applications. Special care is taken during manufacturing to fabricate it with utmost precision to ensure uniformity & perfection.

Typical applications include food packaging (cups, lids, take-out containers), housewares, office products and video and audio cassettes.

► HDPE Granules

Our high grade HDPE plastic granules are a competitive and environmentally sustainable alternative to virgin thermoplastics.

High Density Polyethylene (HDPE) granules are known for their large strength to density ratio and are extensively used in the production of plastic bottles, corrosion resistance piping, geo-membranes and plastic lumber. We also provides HDPE granules customized according to client requirement and specifications.
